IoT Devices & Data-Com Products Key Driver of Revenue Growth

Revenue

(in \$ million)

IoT and Datacom Products

(Revenue in \$ million)

- 1H 2021 revenue increased by 93.4% to \$249.7 million driven by higher production volume and shipment of IoT devices and Data-communication products to customers
- Higher manufacturing activities during 1H 2021 compared with 1H 2020 as:
 - facilities in China were shut down for a shorter period during CNY holiday in February 2021 to meet higher production needs, and
 - additional manufacturing contribution from Malaysia plant.

BUSINESS UPDATE & OUTLOOK

Aztech

- The global components shortage intensified as the supply chain was affected by COVID-19 infection-related shut down to stem the spread. The Group continued with its close collaboration with customers and suppliers to secure the required key components to ensure continuous production at its manufacturing facilities to deliver customers' orders.
- Overall net minimum impact brought about by the national MCO 3.0 at the Group's facility in Malaysia in June 2021 as some production orders were transferred to its China facilities. Seamless collaboration between manufacturing facilities in China and Malaysia enabled smooth production and order delivery.

- As at 30 July 2021, vaccination statistics of our employees in Dongguan, China and Johor, Malaysia are as follows:

Location	Vaccinated – 2 doses	Vaccinated – 1 dose	Not Vaccinated
Dongguan, China	74%	26%	0%
Johor, Malaysia	0.4%	7.51%	92.09%

- In Malaysia, we have submitted application to MITI for plant wide vaccination program. Meanwhile, eligible citizens in Malaysia have also been encouraged to apply through the MySejahtera app for their own vaccination.

⁽¹⁾ Vaccination rate is calculated based on employees who are eligible (based on age and health condition) for the inoculation against COVID-19 virus in compliance with local vaccination guidelines.

- Capacity utilisation rates remained inline with historical pattern. Q-o-q improvement on higher demand and shipment of IoT devices and Data-communication products. China continued to account for the bulk of Q2 2021 production volume.
- Completed the expansion of production facility in Malaysia, and total built up area increased from 45,500 sq ft to 86,000 sq ft.
- Recent COVID-19 infection resurgence led to delay in original schedule to transfer production from China to Malaysia facility, while plan to construct 500,000 sq ft new manufacturing facility has been deferred to end-2022 or beginning-2023, pending locations evaluation till improvement in COVID-19 situation.
- Continue with production maximisation plan to meet the growing demand for IoT and Data-communication activities.

Outstanding Order Book

Order Book Remains Strong

Outstanding Order Book

(in \$ million)

- Order book as at 1 July 2021 was \$530.4 million, and the Group has since received additional orders of \$74.0 million as at 30 July 2021.
 - Barring worsening of infection by COVID-19 virus and supply chain constraints, the majority of the order book secured is expected to be completed in 2021
 - Included are \$150.0 million orders scheduled for completion in FY2022

⁽¹⁾ The Group's order book in respect as at any particular date is subject to changes in its customers' transactions and may not be indicative of its revenue for any succeeding periods.

- The global component shortage situation is unlikely to abate in the next 6-12 months. Collaborative efforts with suppliers, customers and relevant business partners to continue to achieve smooth production and timely delivery of its customers' orders.
 - Leverage on strong customer-supplier relations to secure components
 - Product redesign & innovation to reduce or substitute components
 - Strong cash reserves to optimally fund component purchases
- Growth trajectory offered by the global IoT and data-communication markets, together with the increasing rate of vaccination against COVID-19 virus in countries where the Group has operations in, coupled with strong order book secured to-date and the steps that were put in place to manage and mitigate the impact of the pandemic, the Group is cautiously optimistic of its 2021 performance, barring unforeseen circumstance.
